

# DA-660

## Long Range Antenna

### DA-660

*The DA-660 is pictured here mounted on a pole. The antenna may be mounted indoors or outdoors.*

*The DA-660 is the perfect accessory for monitoring remote buildings or locations up to 1/2 mile away.*

- When a monitored location is more than 1000' away, the DA-660 is the perfect accessory for the wireless Drive-Alert Vehicle Detection Systems (models pictured below)
- This antenna boosts the normal Drive-Alert range up to 1/2 mile (2,500')
- The antenna measures 36" long, 13" wide, and 1.5" high. It weighs approximately 1 pound.
- This is a **FACTORY INSTALLED ACCESSORY** due to the fact that some components must be changed on the control panel for long range applications
- When ordering you must specify which Drive-Alert model you will be using (see four models below) AND state that a DA-660 Long Range Antenna is needed.
- Retro-fits must be shipped back to Mier Products for installation of the components needed for the long range antenna

**Please call us with any installation or technical questions, and we'll be happy to help.  
Don't forget to check out our website!**

Mier Products' line of Wireless Drive-Alert Driveway Vehicle Detection Systems is pictured below for reference
