WIRELESS VEHICLE DETECTION AT ITS BEST

WIRELESS DRIVE-ALERT SYSTEMS

Don't settle for the less-reliable systems on the market. Drive-Alert Driveway Alarms have been the security industry's most popular vehicle detection systems for the past 25 years, and are manufactured by the pioneer in the development of vehicle detection technology...Mier Products. Now, you can get **wireless** systems with the quality and reliability you expect from Mier Products. These systems are also highly adaptable to activate other equipment.

PART #	DESCRIPTION
DA-600	Wireless Drive-Alert control panel and one DA-610 sensor
DA-603	Wireless Drive-Alert control panel, one DA-610 sensor, and one DA-058 remote chime
DA-604	Wireless Drive-Alert control panel, one DA-610 sensor, one DA-058 remote chime, one DA-060 Lamp Module
DA-605	Wireless Drive-Alert control panel, one DA-610 sensor, and one DA-068 remote chime (pictured above)

ACCESSORIES	DESCRIPTION
DA-610	Sensor for the Mier Products' wireless series of Drive-Alerts (for all wireless models)
DA-611	Sensor for the Mier Products' wireless series of Drive-Alerts with an extra 50' of cable for remote sensor placement (for all wireless models)
DA-058	Plug-in Remote Chime for the Mier Products' Drive-Alert models DA-603, DA-604
DA-068	Plug-in Remote Chime for the Mier Products' Drive-Alert model DA-605
DA-070	Battery-powered Remote Chime for the Mier Products' Drive-Alert model DA-605
DA-059	Wall light-switch for the Mier Products' Drive-Alert model DA-604
DA-060	Plug-in Lamp Module for the Mier Products' Drive-Alert model DA-604
DA-655	Chime with Volume Control Accessory - a pleasant chime with volume adjustment for model DA-600
DA-660	Long Range Antenna accessory boosts range up to ½ mile (2500' – 3000') - (for all wireless models)

MIER PRODUCTS' WIRELESS DRIVE-ALERT SYSTEMS

WHAT CAN THESE
AFFORDABLE AND RELIABLE
SYSTEMS DO FOR YOU?

THE BASICS

- 1 Sensor/transmitter detects a vehicle entering a monitored area
- 2 Control panel receives a signal from the sensor/transmitter and triggers an alert

MORE OPTIONS

- 3 A chime is activated in the front room to alert those on the first floor
- 4 A chime is activated in the basement to alert those downstairs
- 5 A chime is activated in an upstairs bedroom to alert those upstairs
- 6 A light is activated to either warn strangers or welcome friends
- 7 A video surveillance camera is activated to record activity
- 8 A portable chime is activated to alert those in the pool or garden

HOW EACH SYSTEM WORKS:

The Drive-Alert's sensor detects cars, trucks, motorcycles, bicycles, or any large moving metal object. When a vehicle is detected, the sensor transmits a signal to the control panel which sounds an electronic alert. Some models can also turn on lights, trigger portable battery-powered chimes, open gates, turn on video equipment, or activate a number of other desired features.

An unlimited number of sensors can be used to protect multiple areas! The sensors can also be placed in or next to stationary equipment such as tractors, mobile homes, campers, gas tanks, trailers, etc. The Drive-Alert will sound an alarm if this equipment is moved. Thus, aiding in the prevention of theft or vandalism.

PEACE-OF-MIND FEATURES AND BENEFITS:

- ☐ Mier Products, Inc. is the pioneer in the vehicle detection industry with over 25 years of experience
- ☐ Know when someone approaches before they are at the door
- ☐ Detect vehicles approaching remote buildings or equipment and be warned to investigate if it is a friend, a customer, or a possible thief
- ☐ It's tamper-proof: if someone tries to move a sensor an alert is triggered
- ☐ Sensors operate from -40 degrees Fahrenheit to +125 degrees
- ☐ Each system includes a limited warranty
- ☐ Each system includes free technical assistance for the life of the product
- ☐ No worries of the false alarms common to IR sensors
- ☐ All of the Drive-Alert Systems are made in the USA!

OPTIONAL FEATURES:

- ☐ Turn on lights for up to 45 minutes whenever a vehicle approaches
- ☐ Sound chimes in multiple rooms, trigger portable battery-powered chimes outside or in a work-shed, turn on lights, and/or activate other equipment
- ☐ Receive notification when customers arrive at a drive-up window

MIER PRODUCTS' WIRELESS DRIVE-ALERT VEHICLE DETECTION SYSTEMS

QUICK AND EASY INSTALLATION

Mount the control panel, plug it in, and place the sensor(s) in the area(s) you wish to monitor....

Plug it in

That's all there is to it!

Place the sensor(s)

THE DA-610 SENSOR/TRANSMITTER

These sensors detect vehicles as they pass within 15 feet, and then transmit a signal to the control panel. Sensors placed on the ground allow for a transmitting distance of about 500 feet. Placing it 3-4 feet high allows for a transmitting distance of 1000 feet. The DA-660 Long Range Antenna accessory boosts this range up to 1/2 mile!

Sensors are enclosed in a durable and weatherproof enclosure. They are powered by just two AA batteries, which last about one year under normal usage and are easy to replace. A low-battery light indicates when it is time to change them.

THE SENSOR IS EASILY HIDDEN:

The DA-610 is about the size of a brick, so it's easy to place and easy to hide. Here are some typical installation examples:

Against a lamp post

Under a fake rock

Within a bush

Higher for a longer range

In a tree

Call or visit our website for more information about these systems and the many accessories that are available. We'll be happy to help you choose a system that best fits your particular application. Just give us a call!

DA-600

- Detects moving vehicles
- Sounds an electronic whistle or the DA-655 chime (below)
- Includes 1 Control Panel and 1 Sensor

DA-603

- Detects moving vehicles
- Sounds unlimited remote chimes
- Includes 1 Control Panel, 1 Sensor, and 1 Remote Chime

DA-604

- Detects moving vehicles
- Sounds unlimited chimes
- Activates unlimited lamp modules or wall switches
- Includes Control Panel, Sensor 1 Remote Chime, & 1 Lamp Module OR Wall-Switch

DA-605 **Best Seller!**

- Detects moving vehicles
- Sounds Plug-in remote chimes
- Sounds Battery-portable chimes
- Includes 1 Control Panel, 1 Sensor, and 1 Remote Chime

DA-605

WIRELESS DRIVE-ALERT

The DA-605 Drive-Alert is the newest model in Mier's line of wireless vehicle detection systems. This completely wireless system detects vehicles approaching and sends an alert through plug-in chimes and battery-powered portable chimes.

These reliable systems are free from the false alarms attributed to other systems on the market and are easy to install!

The DA-605 Drive-Alert gives the purchaser a choice of a DA-068 Plug-in Chime or the DA-070 Battery-powered Portable Chime. The portable chime allows the owner to take it up to 100' away (into the backyard, by the pool, or out to an exterior building). Extra chimes may be ordered and used in any combination and quantity. Furthermore, these chimes have volume control and a choice of three different alert tones.

The DA-605 Control Panel activates the plug-in and portable chimes through radio frequency (315 mhz).

NOTE: For industrial/business applications where a pleasant chime and volume control is needed (ex: Drive-Up Windows) we suggest the DA-500 or DA-600 models with a DA-655 Chime with Volume Control.

The DA-605P (pictured above) includes:

- 1 DA-605CP - Control Panel
- 1 DA-610 - Sensor/Transmitter
- 1 DA-068 - Plug-in Chime

The DA-605B (not pictured) includes:

- 1 DA-605CP - Control Panel
- 1 DA-610 - Sensor/Transmitter
- 1 DA-070 - Battery-powered Portable Chime

The DA-068
Plug-in
Remote Chime

The DA-070
